

Diver-held high Resolution Imaging Sonar Echollogger DS900

Echologger DS900

- Diver-held high Resolution Imaging Sonar

- High resolution sonar images
- Max range : 60m
- Scanning angle 45/60/90°
- High scanning rate
- Sonar image recordable
- Depth rate 100m
- Zero buoyance
- Up to 3 hours working time

Echologger DS900

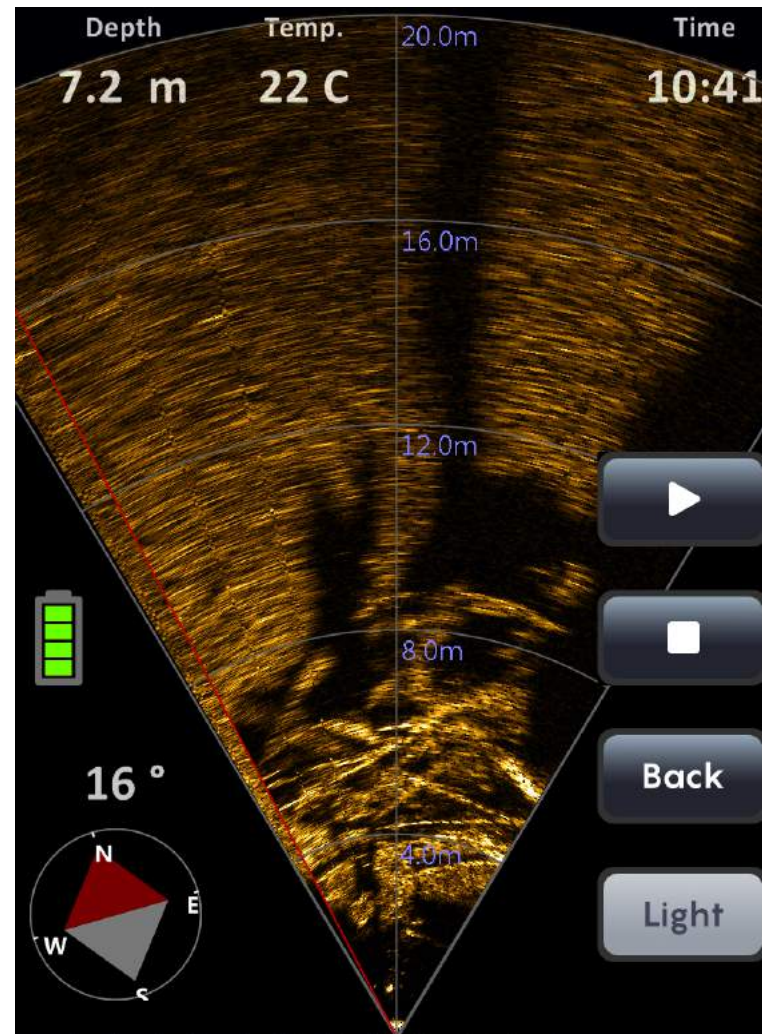

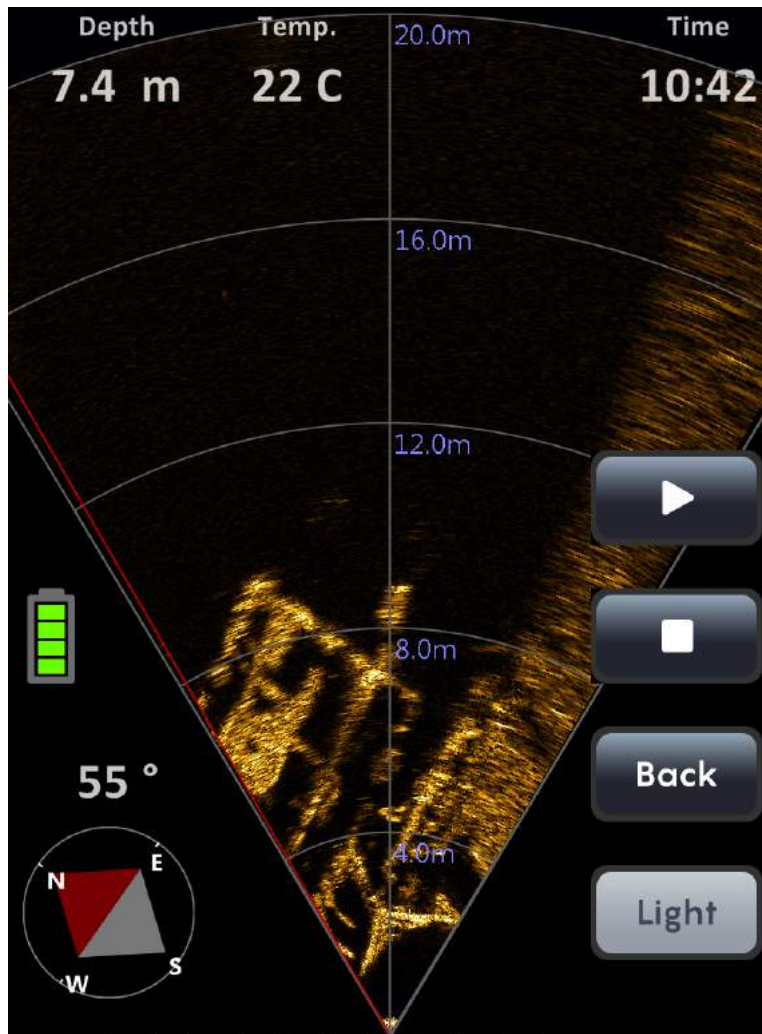

- Diver-held high Resolution Imaging Sonar

- Depth sensor
- Temperature sensor
- Compass integrated
- Underwater camera
 - HD 1280x720
 - Recordable
- Underwater light

Echologger DS900

- Diver-held high Resolution Imaging Sonar

Echologger DS900

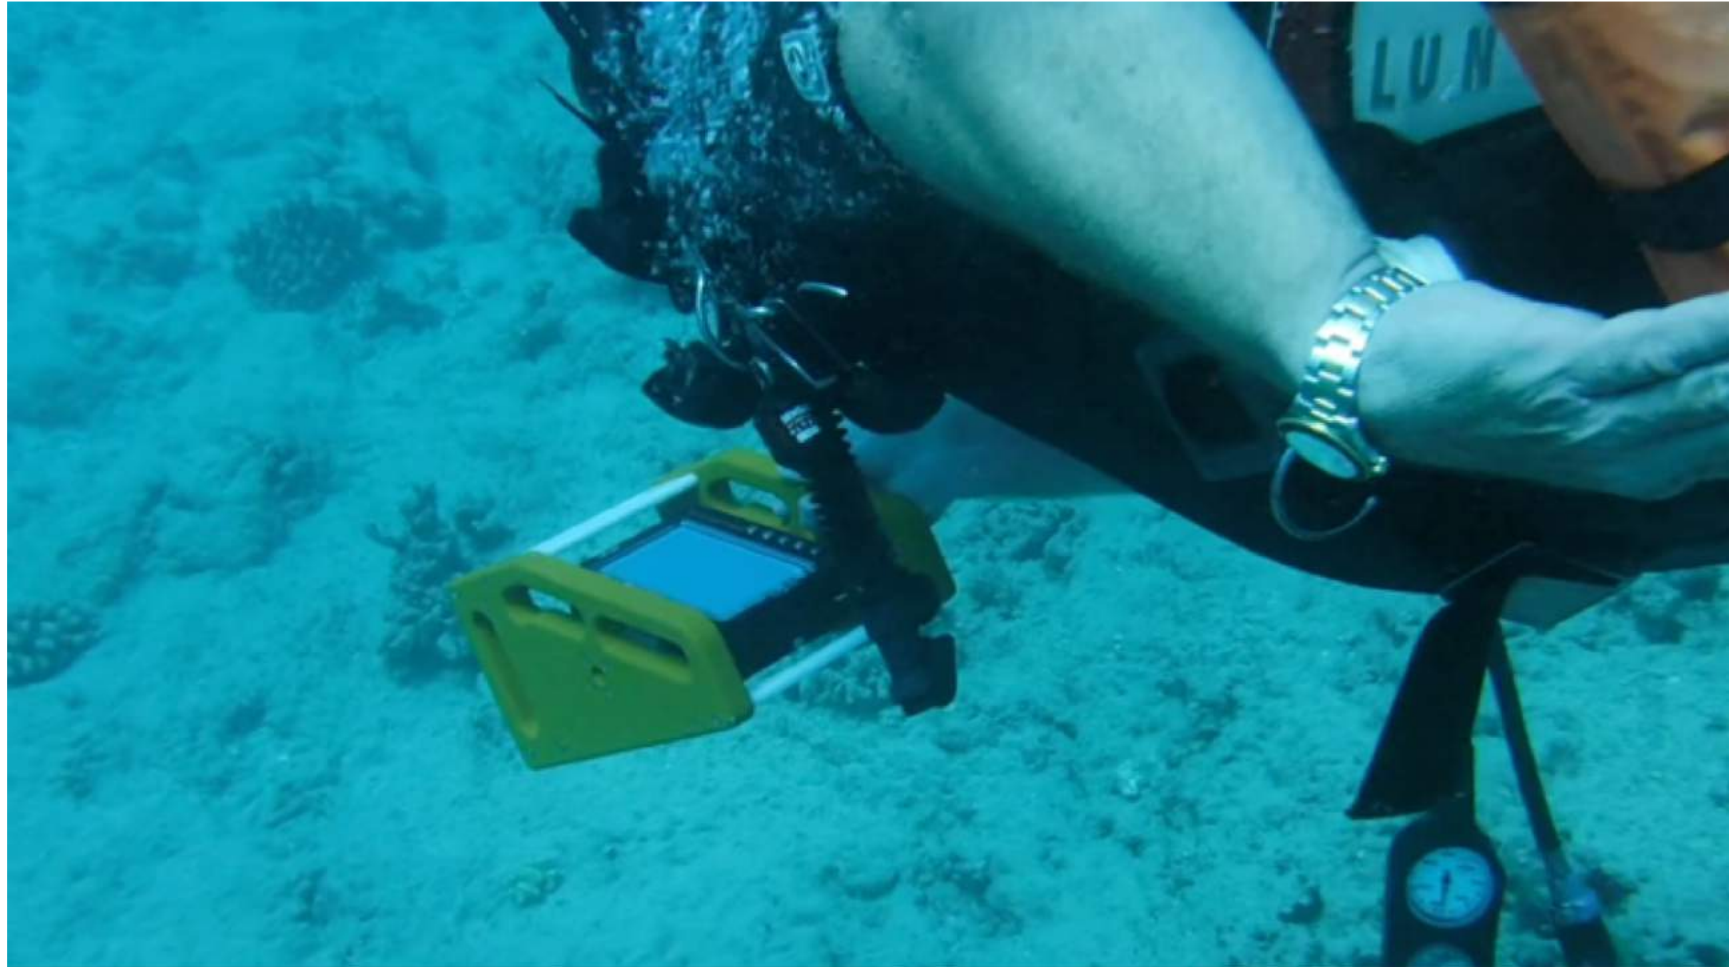

- High resolution sonar images under zero visibility
- Diver-held (swim-board type)
- Real time images fed to divers' eyes
- For SAR (search and rescue)
- For Underwater Inspections
- For Military Operations

Testimonials from two sets of SEAL divers on underwater obstacle courses

“With this unit, that’s the fastest I’ve ever swum the obstacle course”

“We were also able to swim 50 yards offshore, and use the unit to see the pier and swim back to the right spot”
